Devilgotchi Growth Chart and Secret Character Info is here

Just a quick note, the generic term for a Devilgotchi character (whether it be Devil-mametchi or whatever) is Deviltchi (little devil).

The check meter

The check meter tells you several things.

The first screen tells you how many days your Deviltchi has been on Earth

The second screen shows how hungry your Deviltchi is

The third screen shows how happy your Deviltchi is

The fourth screen shows how much "devil power" your deviltchi has (You want this to be a lower number)

Meals

This icon gives you two options to feed your deviltchi. The top option is pie - this will fill one hungry circle. The bottom option is chocolate - it will fill one happy star.

Happiness-up game

This icon will take you to the game. The object is the drop the star so that the Deviltchi will catch it in its mouth as it moves across the screen. Pressing the A button will make the star fall from the top left corner of the screen and pressing the B button will cause it to fall from the top right corner. To win the game, you have to get at least 3 stars in the Deviltchi's mouth. This will fill one happy star

and decrease the DP number. If you manage to get all four stars in, you will fill 2 happy stars.

falling star

nice catch!

Toilet

Use this icon to clean up after your Deviltchi

Kamidanomi

This icon is to be used if your Deviltchi starts acting naughty. You'll know when your Deviltchi has done something bad because the screen will go black and the deviltchi will appear in white. Using this icon will decrease the DP (the higher the DP, the more likely your Deviltchi is to do something bad) *some of the bad things a Deviltchi will do: won't let you see the check meter screens, throw pie back when you try to feed it, pretend to eat chocolate, pretend to fall asleep while playing the game, won't let you clean off the screen (use the toilet icon)

Tamagotchi Square

translated v-pet instructions!

Handshake

handshake screen

Sometimes your Deviltchi will try to be friends with you by extending its hand and offering to shake yours. When this happens, the Deviltchi will beep and the attention icon will light up. Press the A button and you will see the deviltchi stand in the center of the screen with hand extended. Reciprocate by using the handshake icon. This will also decrease the DP number.

Lights

When your Deviltchi goes to sleep you will have to turn the lights out for it. Use this icon and select the off (lower) option.

Attention icon

This icon will light up when your Deviltchi wants something.

Deviltchi events

During certain times and phases, Deviltchi events will happen. There are 12 different events in all and different characters will have different events. Can you spot them all?

A.M.	6:30am	radio exercise program	
Mid-Day	12:00pm	mountain climbing	
	3:30pm	surfing	
P.M.	10:00pm	create a thunderstorm	
	11:30pm	drink sake	
	Midnight	light fireworks	
	Between 8:00pm - 8:00am	a bat will come from Devil-World	

*When an event happens, the devilgotchi will beep so you may want to turn the sound off during the morning or at night so that it doesn't disturb you.

Deviltchi returns to devil-world

When your deviltchi is ready to return to its own world, you will see it crying on the screen. Press the A or B button to see your Deviltchi's final message to you.
